

Title of the presentation:

iGloo_cafe

iGloo_cafe

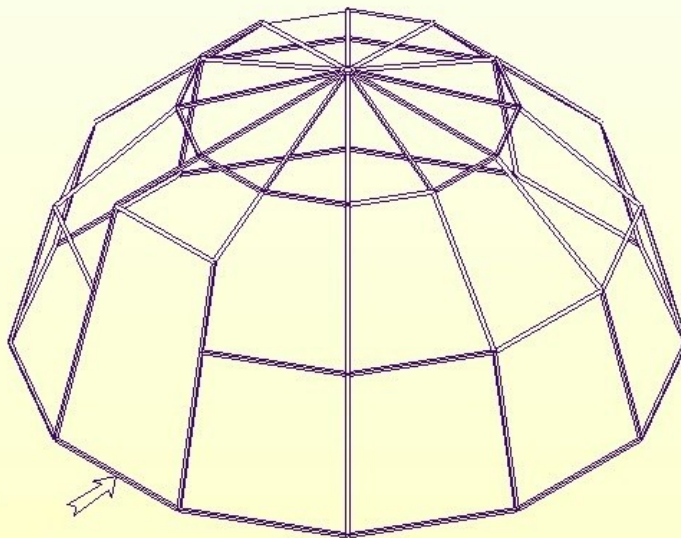

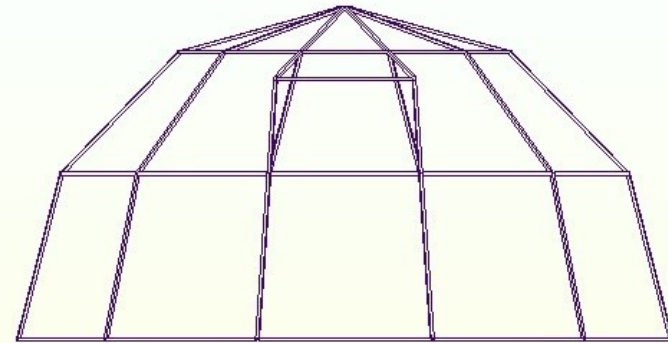

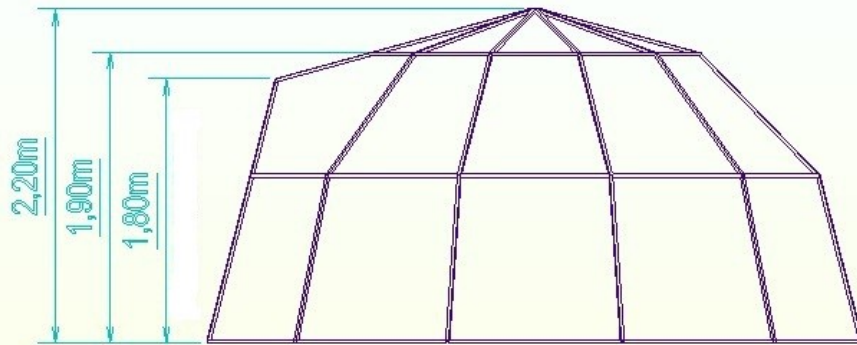

iGloo_cafe

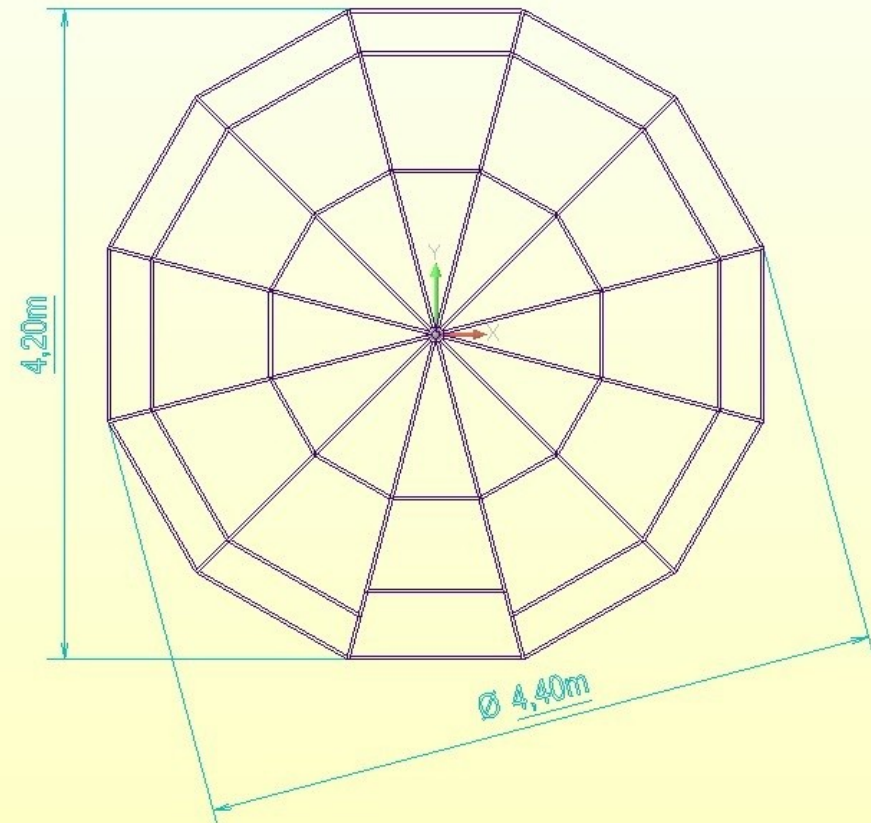

iGloo_cafe

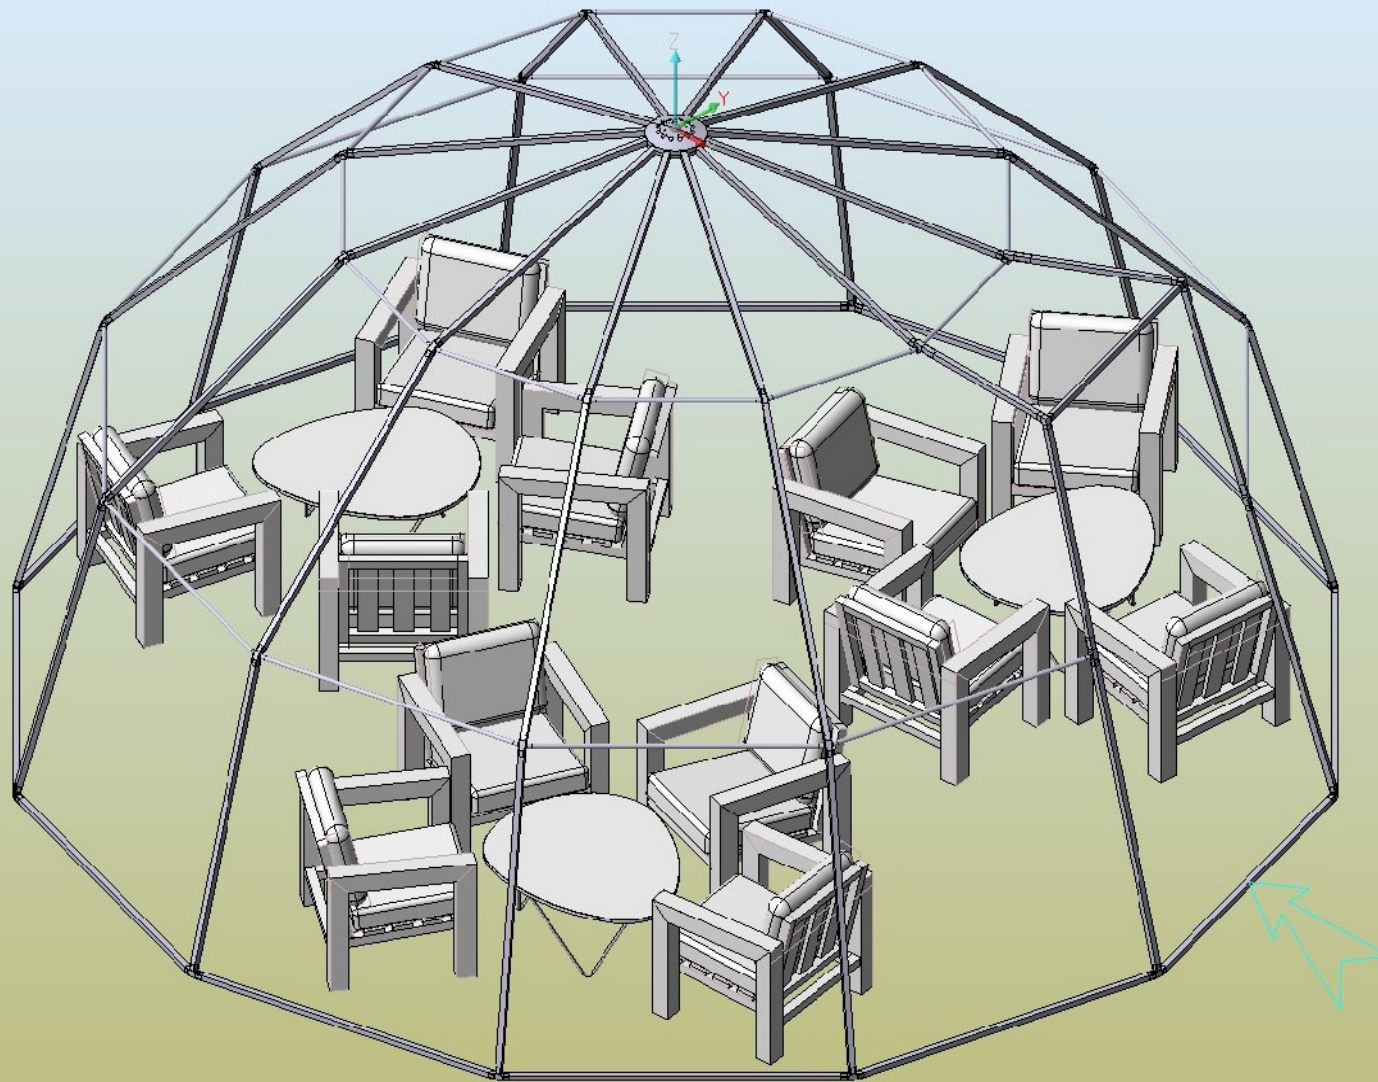

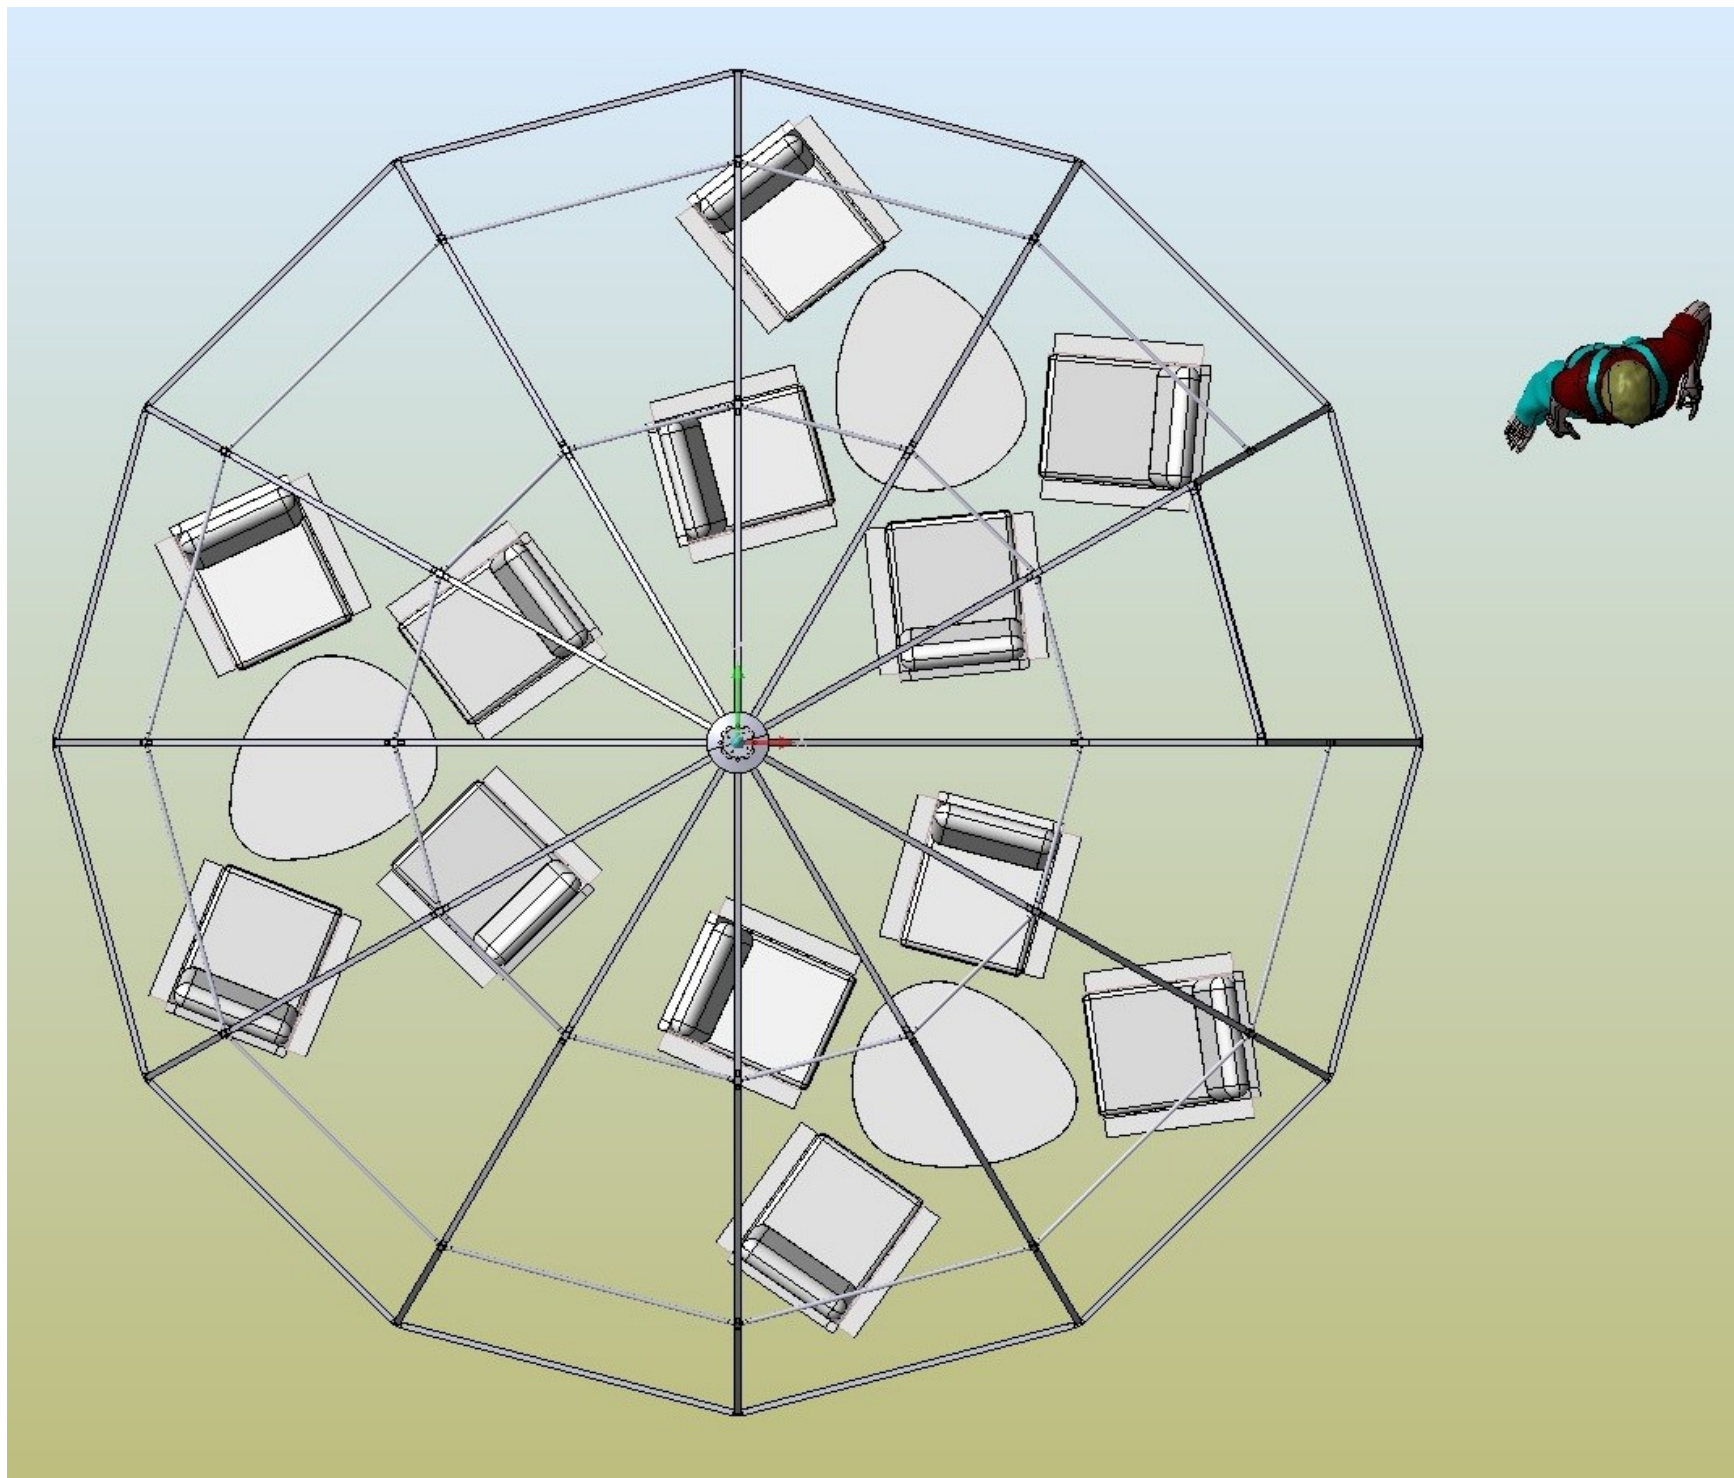

Basic dimensions of the construction.

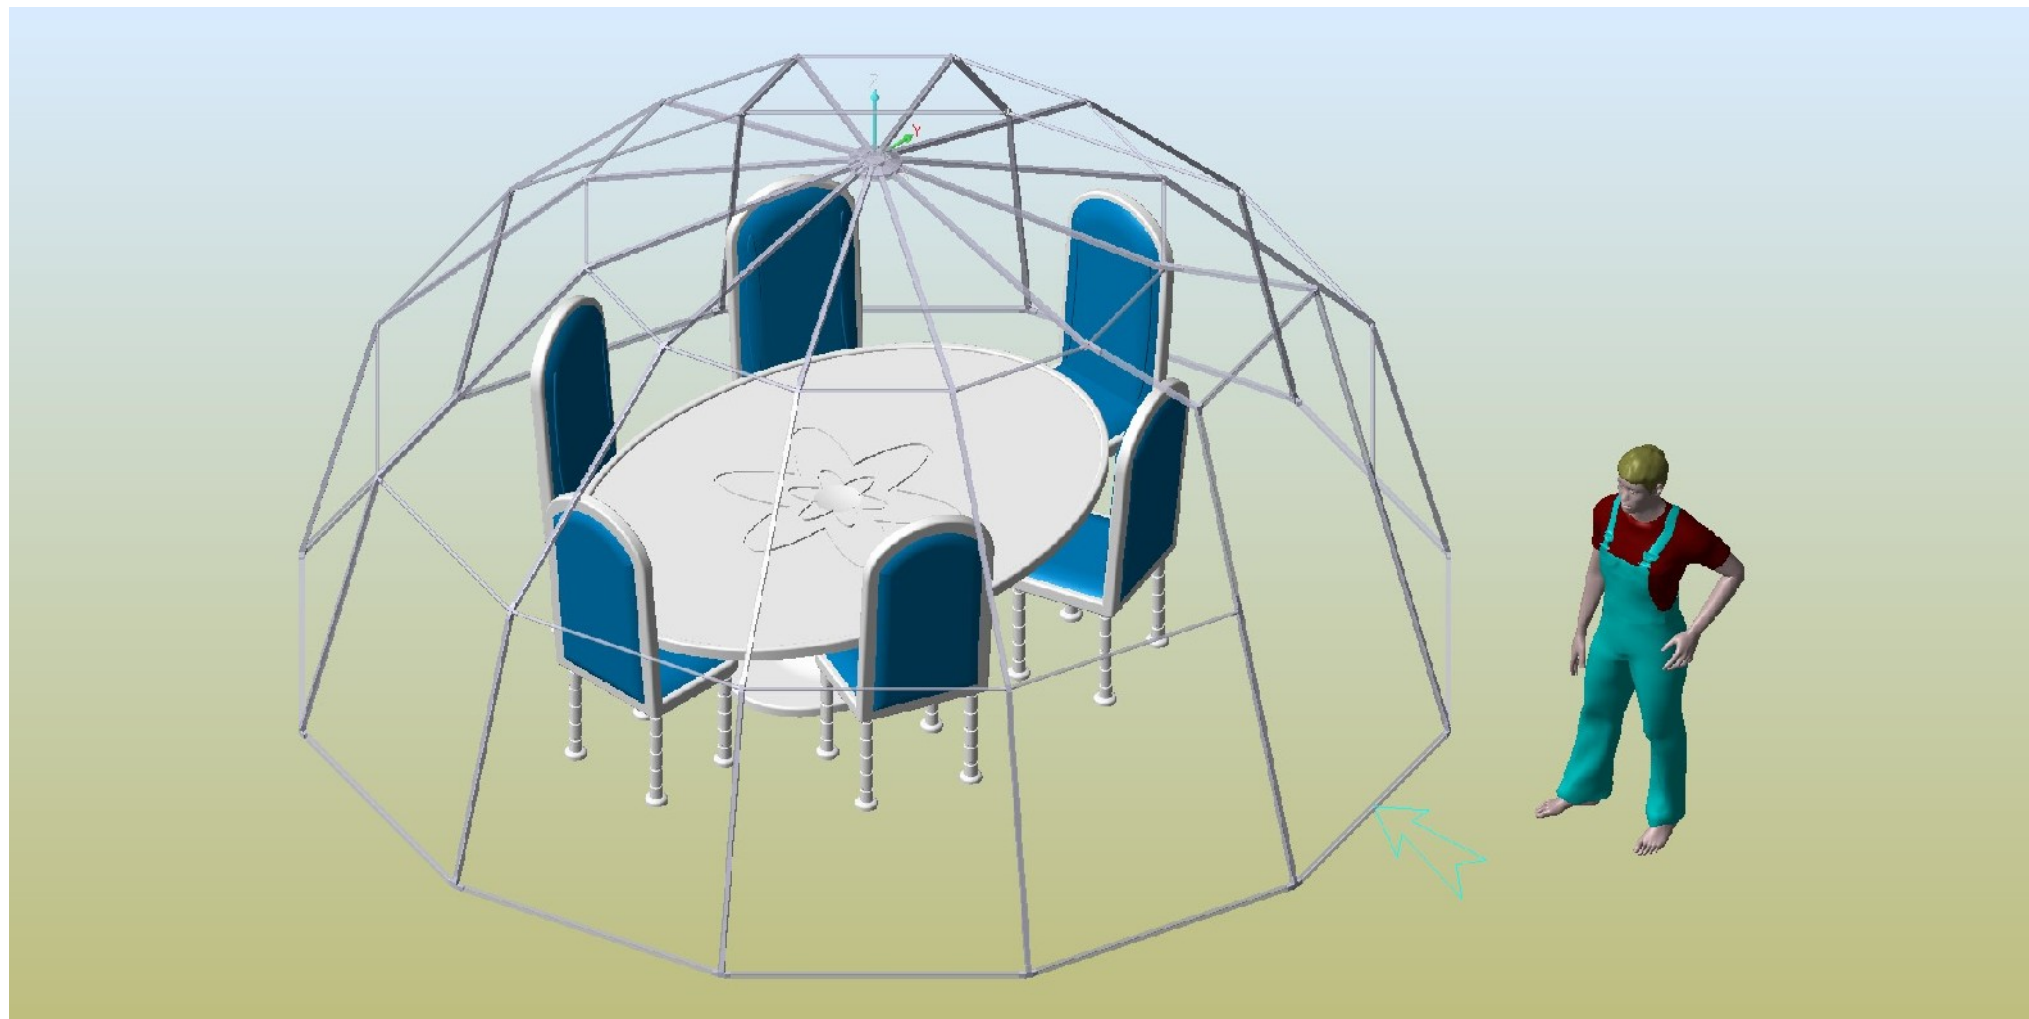

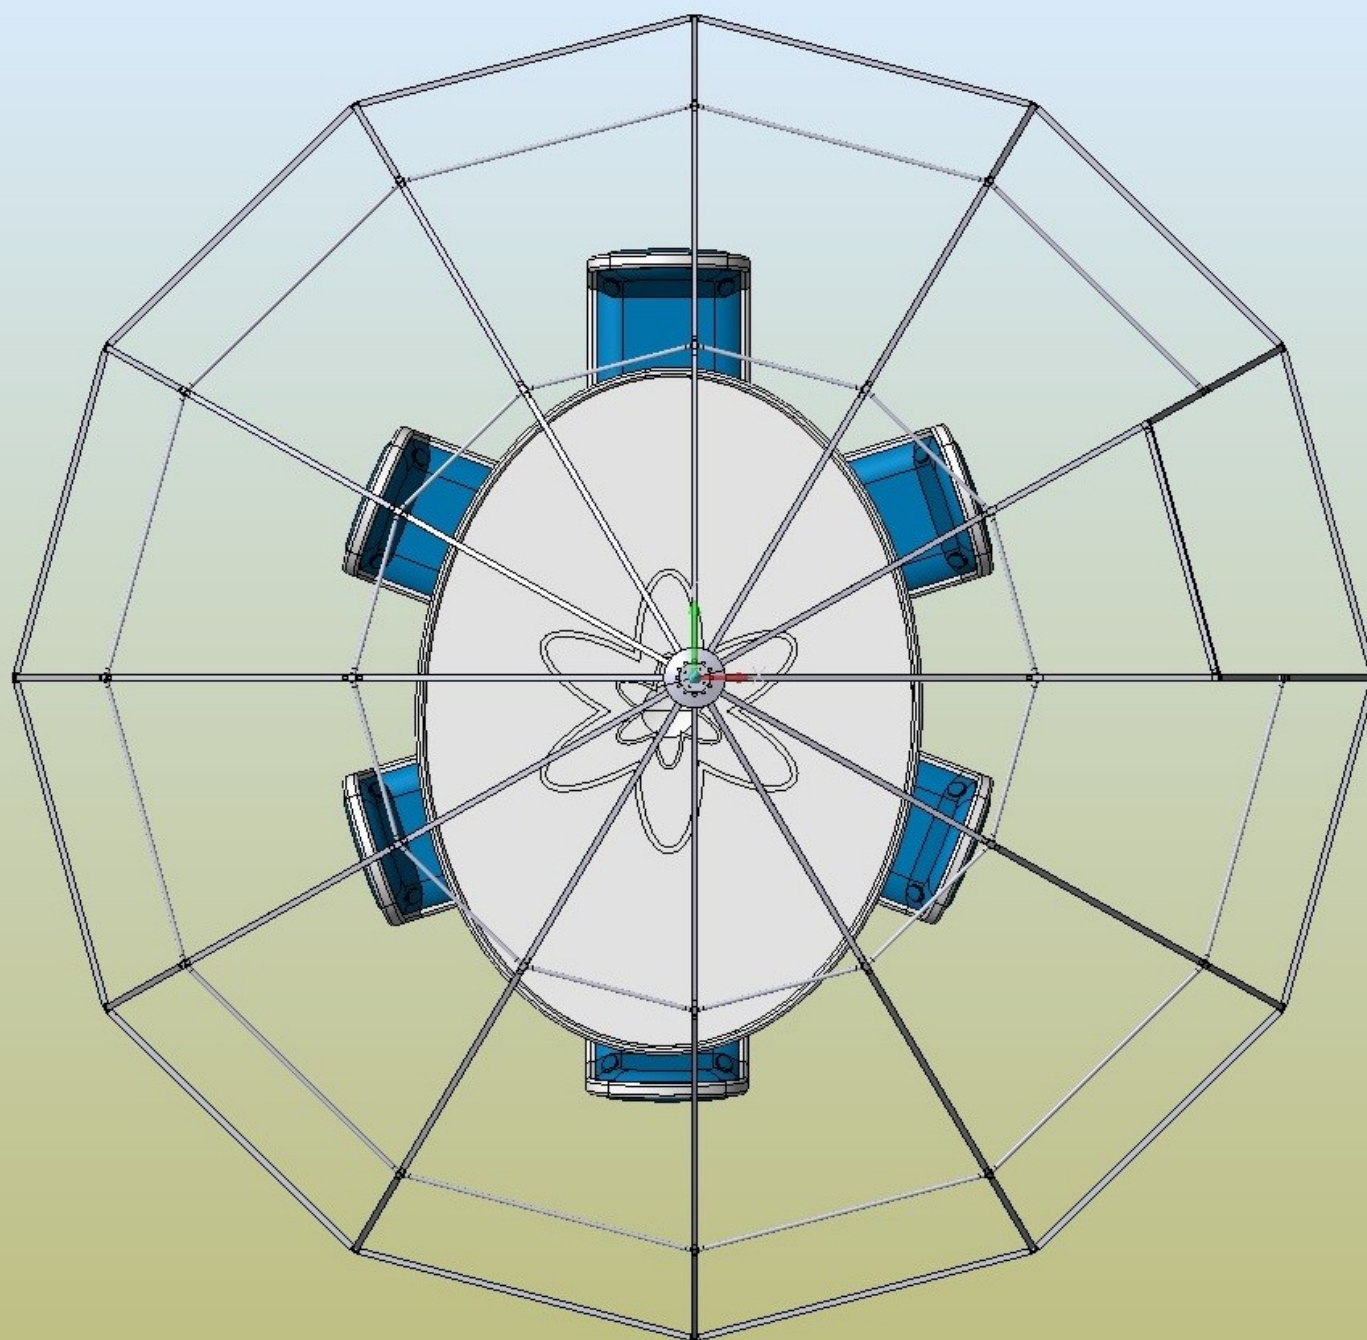

IGLOO = 15,2 m²

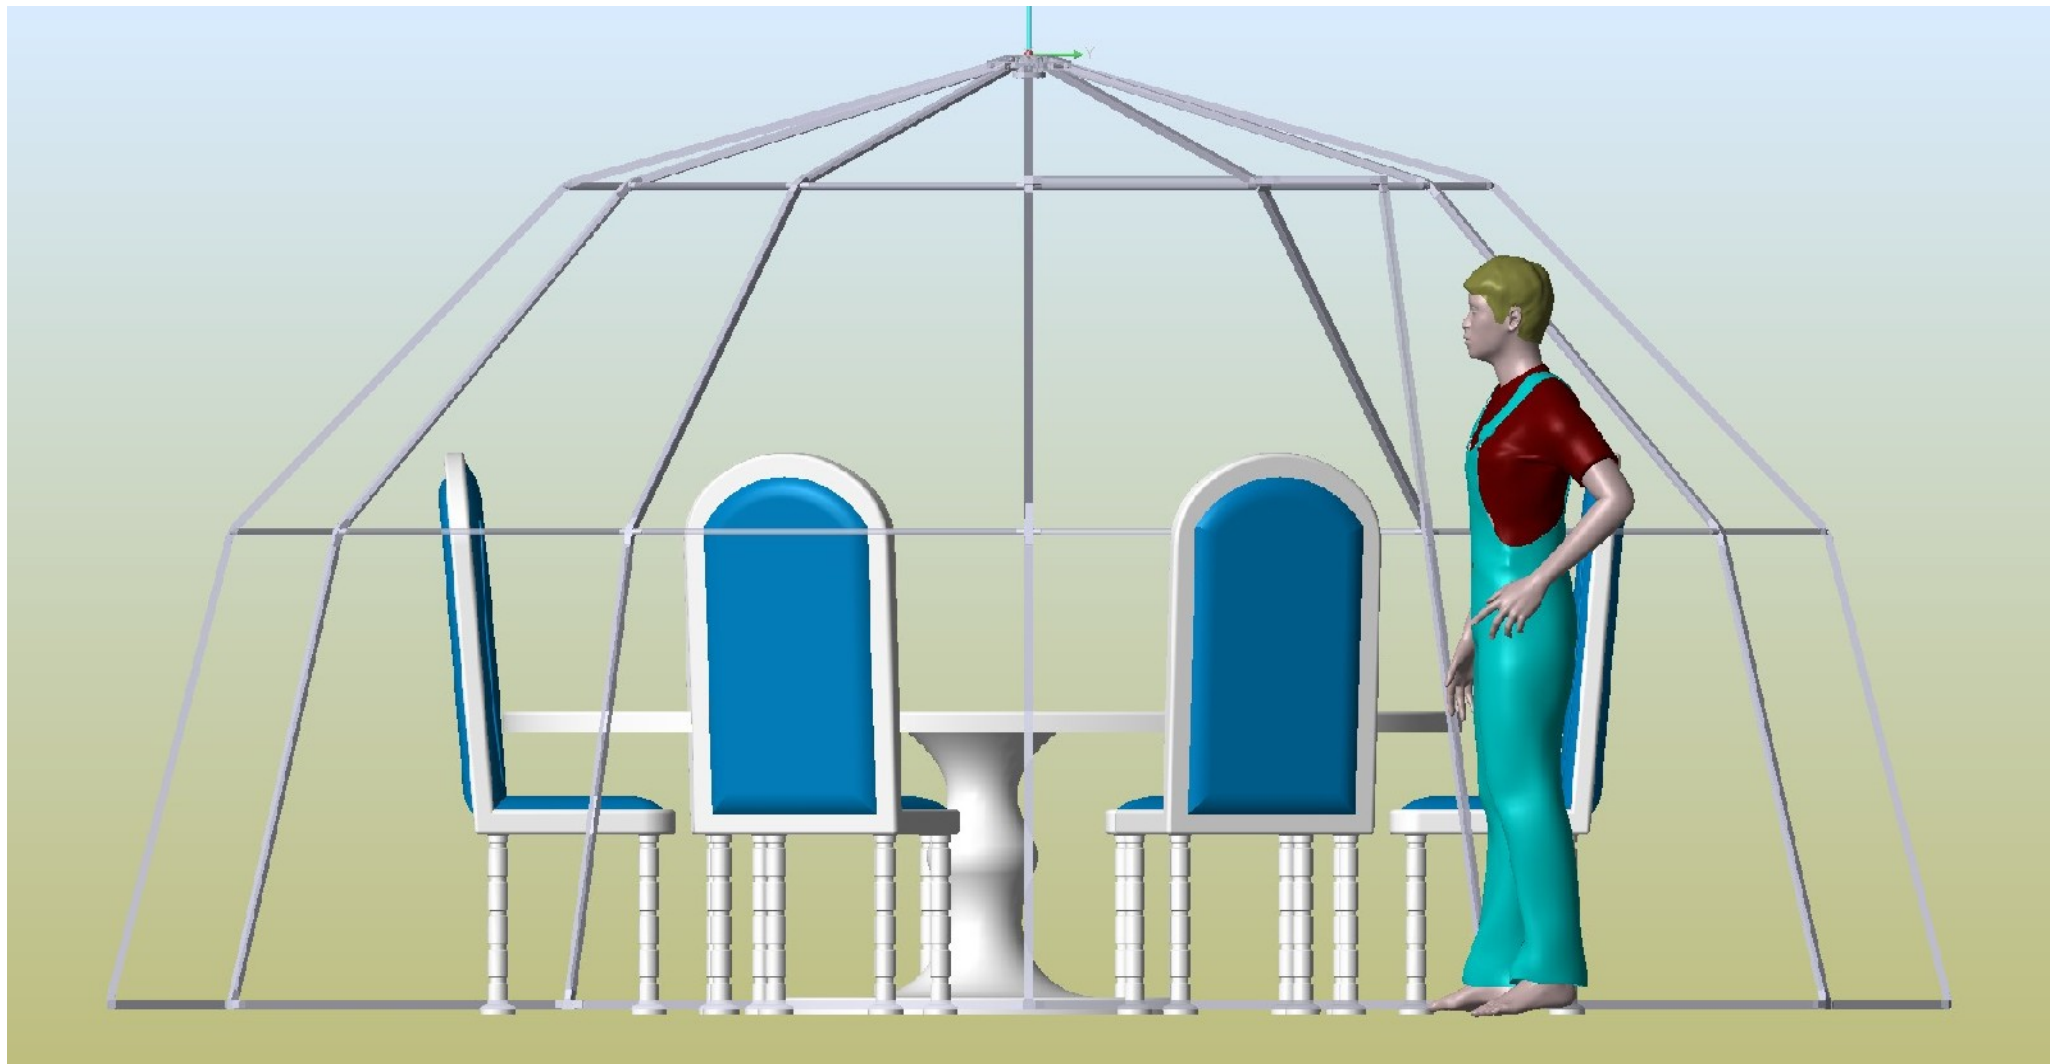

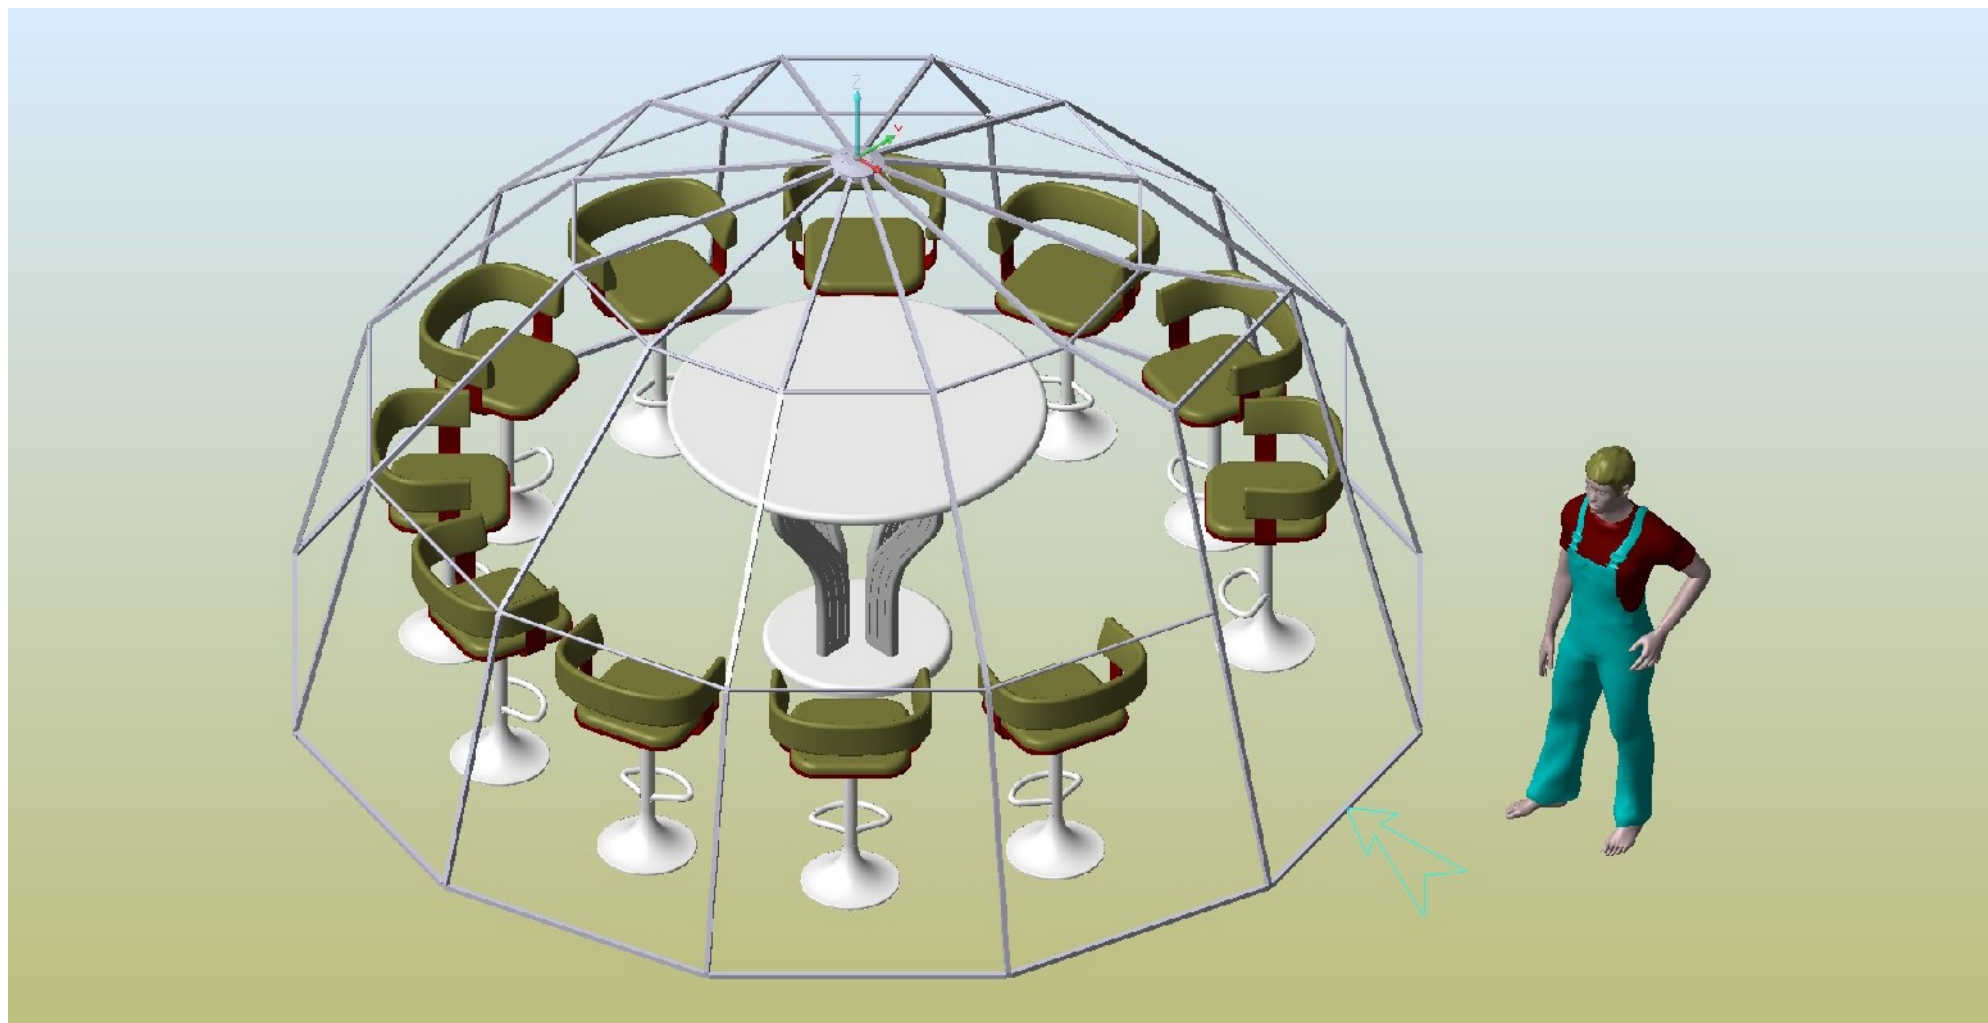

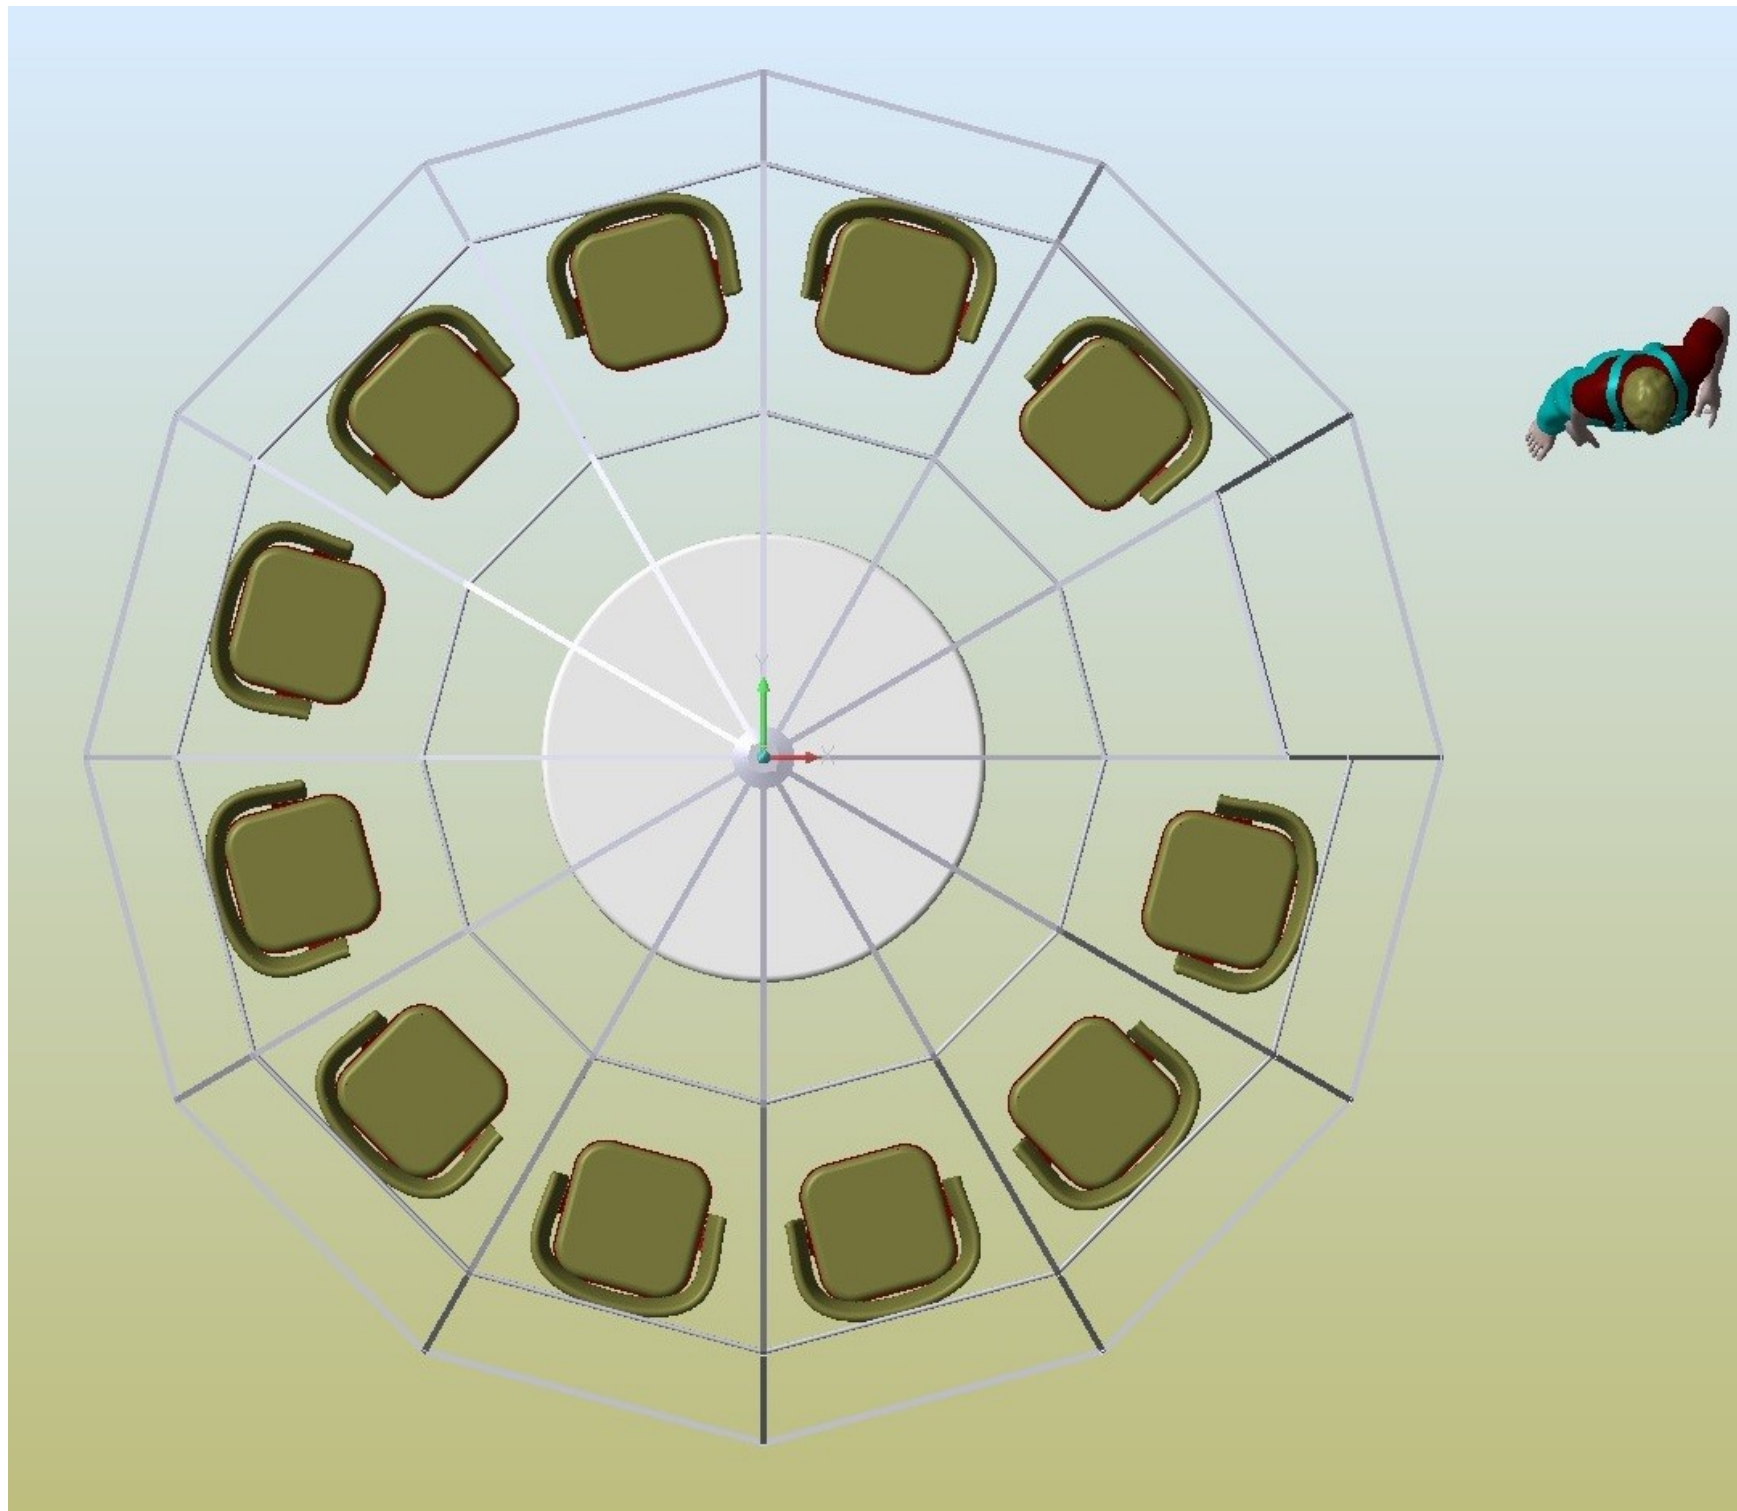

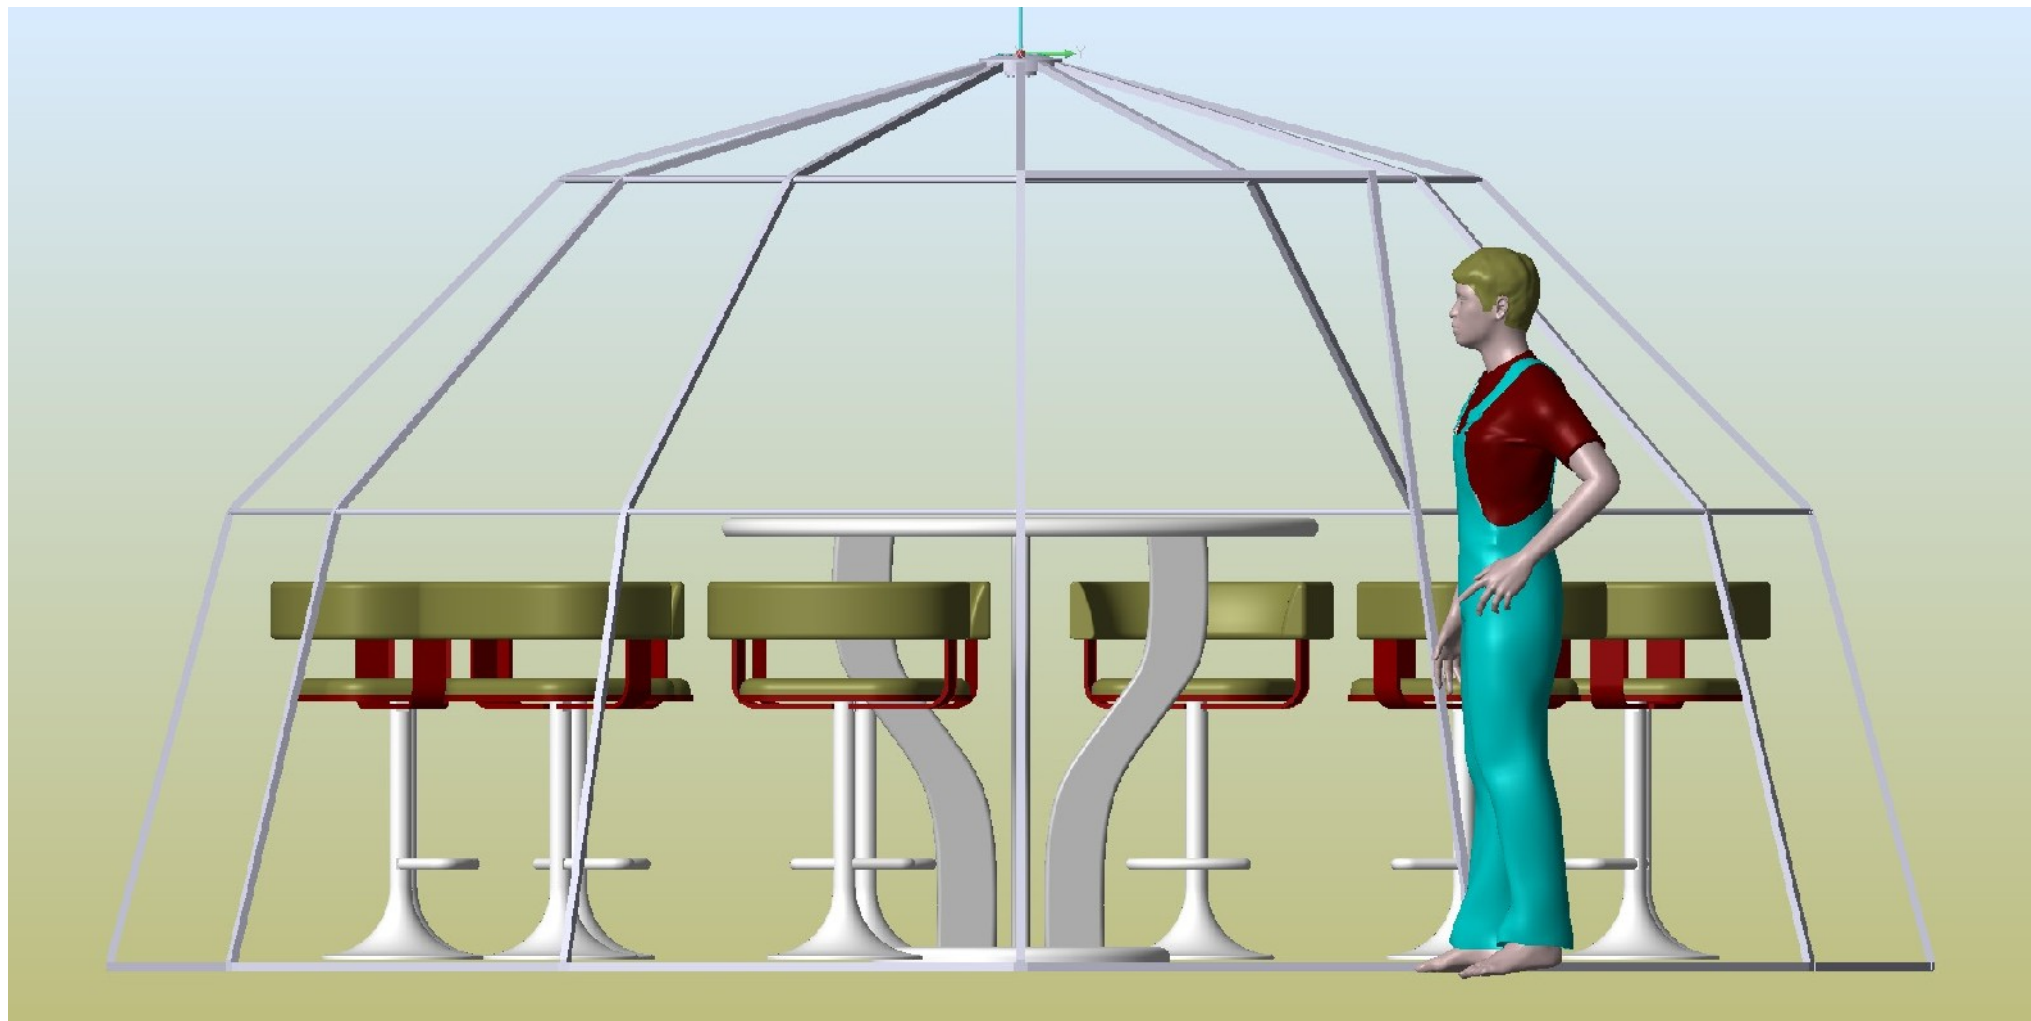

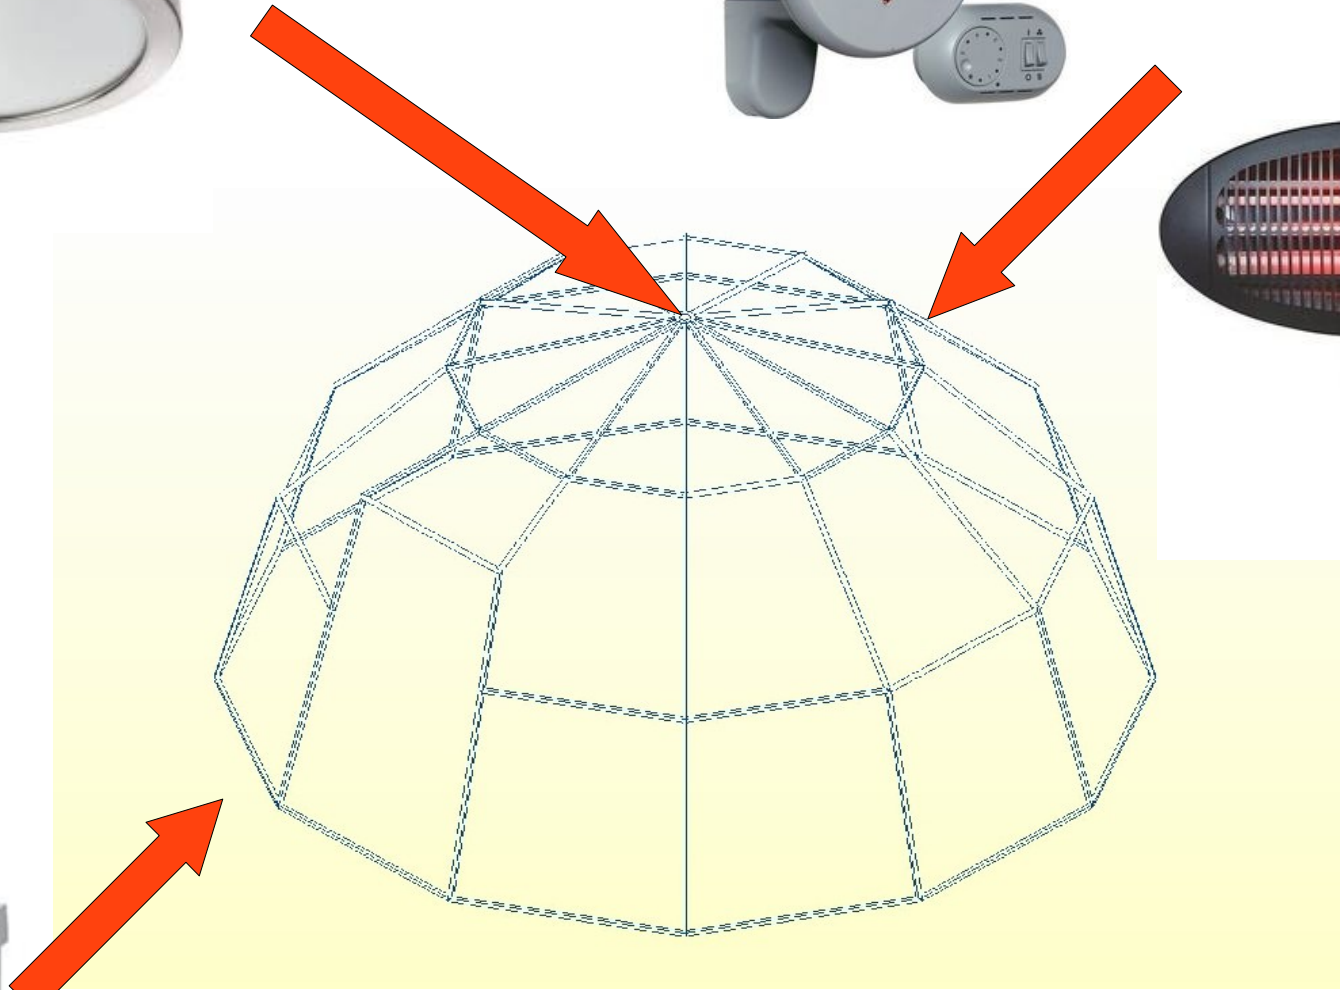

What does the iGloo_cafe contains ?

- Plastic transparent PVC cover (with U.V. protection), which provides thermal insulation.
- Durable painted aluminum farame.
- An internal close thermal insulated area of 15,2 square meters. This area accommodates 3 coffee tables with 12 chairs, or a round dinner table with 10 chairs, or a tall table (bar) with 10-12 tall chairs.
- Lighting in the center of the top, of the construction.
- Heating device (on demand). Electrical heaters or heating fan.
- Autonomous power supply and reception.
- Air ventilation (on demand).
- Sun shade for the summer period (on demand). In this case you must remove the PVC cover.
- Plastic deck (on demand).

Advantages of the iGloo_cafe.

- The construction has **big areas** to advertise any kind of products.
- It is a very **innovative** construction and advertising mean, at the same time.
- **Easy to change over** the advertising message.
- **Stable** and **strong** aluminum frame, very **durable** against the winter weather.
- **Easy to assemble** and install or disassemble and move to another place.
- There is **no need for special building permit**, because it is a transportable construction.
